

Growing Successful Global Partnerships

Maintenance Technician

Department: Engineering

The story so far

Briar Chemicals has in excess of 65 years of chemical manufacturing heritage and an established reputation for excellence, through continuous improvement, dependability, social & environmental responsibility.

Key highlights of the Briar business

- Technical leader in the development and contract manufacturing of some of the world's most complex chemistry
- Established site in excess of 100 acres in Norwich, Norfolk – the heart of East Anglia
- Dedicated site for product formulation and packaging
- Experienced global exporter

Our vision is to cultivate innovative and sustainable solutions through partnerships: meeting the changing needs of a diverse planet.

People and culture

We have around 250 permanent employees and we invest in our people as believe that they are our greatest asset. We'll give you freedom to bring your whole self to work and we welcome people who mirror our values. Join a team where our core values of **Safety, Integrity, Teamwork** and **Engagement** define who we are, how we work, and what we aspire to be as an organisation.

The role

The Engineering department has a fantastic opportunity for a permanent **Maintenance Technician** to join the team.

What you'll be doing

Reporting to the Workshop Manager, the role will cover:

- Mechanical maintenance on a variety of process plants including; pumps, vessels, separation equipment, heat exchangers, hydraulic /pneumatic and piping systems.
- Reading and interpreting technical/engineering drawings and circuit diagrams.
- Basic electrical work on such items as electric motors and starter circuits.
- Complete mechanical assembly and pipe preparation tasks.
- Valve repair/ refurbishment including pressure testing.
- Undertaking accurate CMMS report writing and record keeping, ensuring an auditable closed loop system.

- Operation and maintenance of the CHP plant, which includes gas compression, steam generation, electricity generation.
- Daily and weekly monitoring of plant.
- Equipment failure Root Cause Analysis.
- Promote and adhere to high standards of housekeeping and engineering hygiene.

The successful candidate will be required to participate in an **out of hour's call-out rota**, once deemed competent, for which they will receive additional remuneration.

What you will bring

Essential:

- NVQ Level 3 in a mechanical maintenance discipline.
- Relevant hands-on experience in engineering maintenance (a minimum of 3 years).
- A comprehensive knowledge of various models and types of pumps, with practical experience of dismantling and repairing to OEM standards.
- Experience and a good understanding of the importance of rotating equipment being fully aligned during installation.
- PC skills including Microsoft Word and Excel and basic electrical skills.
- The ability to multi-task and problem solve, using reliability data to identify improvement needs.
- Be able to work flexibly and have a positive attitude.
- Have the ability to communicate clearly and work well as part of a team.

Desirable:

- An understanding of boiler operations, maintenance and repair.
- Experience of working in an industrial workplace with high hazard environments, and knowledge of applicable regulations and safe systems of work.
- Electrical experience to ensure effective interaction with ECI disciplines.
- Member of a nationally recognised body e.g. Engineering Council.

How you will be rewarded

We offer a competitive salary and benefits package, which includes an annual bonus, group personal pension scheme where we will match your contributions plus 2%, private healthcare scheme, and 33 days annual leave (inclusive of bank holidays).

How to apply

If this exciting opportunity resonates with you, please apply with a covering letter and CV to hr.office@briarchemicals.com.
